Refreshed Mitsubishi Outlander PHEV launches with new battery, more range and other key updates

- *New 22.7 kWh battery delivers 72 km of EV-only range*
- *2026 edition gets updated interior, exterior, refined driving dynamics*
- *All trims feature Dynamic Sound Yamaha audio systems*
- *Outlander PHEV remains Canada's best-selling plug-in hybrid vehicle*
- *ES S-AWC trim qualifies for $2,500 Federal EV rebate*

MISSISSAUGA, ON, March 9, 2026 – Mitsubishi Motor Sales of Canada (MMSCAN) has officially launched the 2026 edition of its flagship Outlander PHEV compact sport utility vehicle featuring key refinements thanks to a mid-cycle refresh.

Going on sale this month at the brand's 97 dealers across Canada, the 2026 Mitsubishi Outlander PHEV features significant refinements highlighted by a new 22.7 kWh battery offering 72 km of EV-only range – up 18% from the previous edition. Total combined driving range is now 690 km while combined efficiency improves to 3.2 Le/100 km and gas-only efficiency improves to 8.6L/100 km[1] for both city and highway driving. The new battery has also increased EV power output, resulting in faster acceleration and a better overall driving experience.

On the outside, the Outlander PHEV gets a styling refresh including striking new wheels on all trims, as well as retuned suspension, and both tire and steering updates that improve ride comfort and handling. The updated vehicle is also quieter thanks to additional sound deadening and vibration improvements.

Inside Canada's best-selling plug-in hybrid vehicle, the three-row interior gets even better, with a new centre console design, new seat materials and colour options, and the addition of the Dynamic Sound Yamaha audio on all trims. There's also a new 12.3-inch infotainment display, as well as updated digital driver display graphics.

The Outlander PHEV is available in seven trims starting with the ES S-AWC at $49,998[2], which qualifies for the new $2,500 Federal Electric Vehicle Affordability Program rebate.

Outlander PHEV Trim	MSRP
ES S-AWC	$ 49,998
SE S-AWC	$ 52,598
LE S-AWC	$ 54,798
SEL S-AWC	$ 57,598
GT S-AWC	$ 60,598
GT PREMIUM S-AWC	$ 61,698
GT NOIR S-AWC	$ 63,048

All trims are equipped with Mitsubishi Motors' Super All-Wheel Control system and a suite of safety-focused Advanced Driver Assistance Systems (ADAS). The vehicle is also covered by Mitsubishi's 10-year/160,000 km Powertrain Limited Warranty, 10-year/160,000km Lithium-Ion Battery Limited Warranty, 5-year/100,000 km New Vehicle Limited Warranty and 5-year/Unlimited km Roadside Assistance.

Note to media: A gallery of photos and video from the 2026 Outlander PHEV can be found here.

[1] Range and fuel efficiency claims are based on Natural Resources Canada ratings. For comparison purposes only. Actual range and fuel efficiency will vary with model, options, driving and vehicle conditions.
[2] Manufacturer's Suggested Retail Price. Excludes destination/handling, tax, title, licence etc. Retailer price, terms and vehicle availability may vary. See Mitsubishi Motors retailer for details.

About Mitsubishi Motor Sales of Canada, Inc.
Mitsubishi Motor Sales of Canada (MMSCAN) is the sales, service, parts and marketing arm for Japan's Mitsubishi Motors. The 2026 product range includes the RVR subcompact crossover, Eclipse Cross compact sport utility, Outlander compact sport utility, and the Outlander PHEV, Canada's best-selling plug-in hybrid vehicle. MMSCAN supports its 97 dealerships with a head office team and parts distribution centre, both located in Mississauga, Ontario. Established in 2002, MMSCAN and its dealerships employ more than 2,100 people in communities large and small.
